

## Special Issue

# 2025 9th International Conference on Electronic Information Technology and Computer Engineering

### Message from the Guest Editors

Dear Colleague, The 2025 9th International Conference on Electronic Information Technology and Computer Engineering (EITCE 2025) serves as good platforms for academics, researchers, and engineers to meet and exchange innovative ideas and information on all aspects of electronic information technology and computer engineering. The 2025 9th International Conference on Electronic Information Technology and Computer Engineering (EITCE 2025) (<https://eitce.org/>) will be held on June 13–15, 2025, in Chongqing, China. EITCE 2025 aims to bring together leading academic scientists, researchers, and research scholars to exchange and share their experiences and research results on all aspects of electronic information technology and computer engineering. The conference will provide a premier interdisciplinary platform for researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns, as well as the practical challenges encountered and solutions adopted, in the fields of electronic information technology and computer engineering.

### Guest Editors

Prof. Dr. Xin Luo

College of Computer and Information Science, Southwest University, Chongqing, China

Prof. Dr. Di Wu

Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, Chongqing, China

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
