

Special Issue

Symmetry: Feature Papers 2016

Message from the Guest Editor

As Editor-in-Chief of the journal *Symmetry* (Impact Factor of 0.826 in 2014), I am glad to announce the Special Issue “Symmetry: Feature Papers 2016” online at http://www.mdpi.com/journal/symmetry/special_issues/symmetry_feature_papers_2016. We aim to introduce a new insight into science development or cutting edge technology related to the symmetry field, which will make a great contribution to the community. Thus, we will strictly select 5–10 papers each year, as of 2016, from excellent scholars around the world to publish for free in order to benefit both authors and readers. You are welcome to send short proposals for submissions of Feature Papers to our Editorial Office (symmetry@mdpi.com). They will be evaluated by Editors first. Please note that selected full papers will still be subject to a thorough and rigorous peer review.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
