Message from the Guest Editors

Dear Colleagues,

Communication in the age of digital media is advocated as a fundamental tool in unique historical and social moments such as the economic and social recovery after the global pandemic caused by the coronavirus as well as the current global war scenario. With the potential demonstrated by digital media, this Special Issue welcomes the submission of studies aimed at improving the environment through communication and in accordance with the Sustainable Development Goals promoted by the 2030 Agenda. As main lines of work derived from the main theme, Communication for the Digital Media Age, the following stand out: health communication; female entrepreneurship (female startups); women's leadership; communication, data mining and tourism; happiness management and communication; quality of life and citizen improvement; environmental management; fake news, disinformation and misinformation; and the influence of political, technological, economic and social changes on communication.

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
