### Message from the Guest Editors

Dear Colleagues,

Enterprise ecosystems refer to the interaction and mutual influence of enterprises and their multifaceted and multilayered environment. As a complex system, the enterprise ecosystem includes social, political, economic, and cultural elements that support various enterprise activities such as management, sourcing, production, delivery, etc. However, the enterprise ecosystem embodies a very high level of uncertainty and diversity. Therefore, it is a promising research trend to explore various approaches, models, methods, and techniques to examine enterprise ecosystems' uncertainty and diversity.

This Special Issue aims to provide a forum for academics and practitioners to explore and present enterprise ecosystems' uncertainty and problematic diversity areas and different practices. These include, in particular, but not exclusively: Enterprise ecosystems; National and regional enterprise ecosystems; Policies for stimulating enterprise activities etc.

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
