Extended Reality Application and Management Systems

Guest Editors:

Prof. Dr. Tai-hoon Kim

School of Economics and
Management, Beijing Jiaotong
University, Beijing 100044, China

Prof. Dr. Sabah Mohammed

Department of Computer
Science, Lakehead University,
Thunder Bay, ON P7B 5E1,
Canada

**Prof. Dr. Luis Javier Garcia
Villalba**

Group of Analysis, Security and
Systems (GASS), Universidad
Complutense de Madrid (UCM),
28040 Madrid, Spain

Deadline for manuscript
submissions:

closed (20 November 2022)

Message from the Guest Editors

Dear Colleagues,

Extended reality (XR) is a term used to refer to mixed reality (MR) technology that encompasses both virtual reality (VR) and augmented reality (AR). The applications of XR are emerging in everyday life through the use of immersive technologies that can merge the physical and virtual worlds. Although XR has been flourishing in fields such as education, gaming and entertainment, it is becoming critical in other fields and practices for its ability to visualize a completed project in advance and demonstrate how to control and manage it based on sound simulation or avatars that can interface with actual systems. This Special Issue focuses on studies related to XR applications and management systems. We are interested in submissions that utilize a variety of methodological perspectives and welcome both original research and review articles.

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
