

## A Systems Approach to Sustainability within Agenda 2030 and across SDGs

Guest Editors:

**Prof. Dr. Alberto De Marco**

**Dr. Alberto Stanislao Atzori**

**Dr. Ilaria Perissi**

**Dr. Stefano Armenia**

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

The Sustainable Development Goals demonstrate the scale and ambition of a new, universal approach to sustainable development for our planet: the 2030 Agenda.

This SI is focused on exploring, analyzing and proposing various interdisciplinary systemic and dynamic approaches to solve social, technical, managerial, engineering, and decision-making problems in order to achieve the vision of the Agenda, as a whole or with regards to one SDG or a specific subset of SDGs.

The SI is open to practical and theoretical contributions. Papers reporting and presenting methodological and technological advances related to the application of simulation modelling-related theory and/or practice will be particularly welcome. Topics include but not limited to:

- understanding and representing dynamic complexity and interdependencies among SDGs
- short and long-term implications of specific SDGs-targeted policies
- unintended consequences, resistance factors, and collateral costs to achieving the SDGs
- integrated policy impacts on multiple SDGs
- policies based on resilient mechanisms enabling SDGs
- highlights on long term effects of sustainable practices in different sectors

## Editor-in-Chief

### **Prof. Dr. William T. Scherer**

Chair, Department of Systems  
and Information Engineering,  
University of Virginia,  
Charlottesville, VA 22904, USA

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

**Journal Rank:** JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (*Modeling and Simulation*)
