Deadline for manuscript
submissions:

30 May 2019

Message from the Guest Editors

The Sustainable Development Goals demonstrate the scale and ambition of a new, universal approach to sustainable development for our planet: the 2030 Agenda.

This SI is focused on exploring, analyzing and proposing various interdisciplinary systemic and dynamic approaches to solve social, technical, managerial, engineering, and decision-making problems in order to achieve the vision of the Agenda, as a whole or with regards to one SDG or a specific subset of SDGs.

The SI is open to practical and theoretical contributions. Papers reporting and presenting methodological and technological advances related to the application of simulation modelling-related theory and/or practice will be particularly welcome. Topics include but not limited to:

- understanding and representing dynamic complexity and interdependencies among SDGs
- short and long-term implications of specific SDGs-targeted policies
- unintended consequences, resistance factors, and collateral costs to achieving the SDGs
- integrated policy impacts on multiple SDGs
- policies based on resilient mechanisms enabling SDGs
- highlights on long term effects of sustainable practices in different sectors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ockie Bosch

1. Distinguished Guest Professor, School of Design and Management, Keio University, Kanagawa 223-8521, Japan
2. Co-Partner, Malik Management Institute, Geltenwilenstrasse 16, 9000 St. Gallen, Switzerland
3. Director, SysPrac Pty Ltd, 4 Savoy Place, Howrah, TAS 7018, Hobart, Australia
4. Honorary Professor, Business School, University of Adelaide, Adelaide, SA 5005, Australia

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI - Web of Science) and in DBLP Computer Science Bibliography.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 25.8 days after submission; acceptance to publication is undertaken in 5.4 days (median values for papers published in this journal in the second half of 2018).
