

## Special Issue

# Sustainable Urban Transport Systems

### Message from the Guest Editors

In an era of environmental and socio-economic crisis, the development of sustainable urban transport systems is as imperative as ever. In alignment with Target 11.2 of the United Nations Sustainable Development Goals Agenda, as well as the European Union Urban Mobility Framework, sustainable urban transport systems must be a priority. Safe, affordable, emission-free, resilient, inclusive, accessible and smart transport systems need to be developed in urban areas, with autonomous and electric vehicles, public transport, walking, cycling and other “green” transport modes emerging as promising solutions within the framework of sustainability. However, each solution is characterized by both opportunities and challenges, which need to be identified, studied and efficiently managed, in the context of integrated transport and urban planning. This Special Issue seeks papers that can contribute to scientific research related to sustainable urban mobility, providing policy-makers with valuable knowledge and support tools towards developing sustainable urban transport systems in practice. ## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei  
Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -  
Q2 (Modeling and Simulation)
