

## Special Issue

# Systems Analysis of Enterprise Sustainability

### Message from the Guest Editor

In the 4th Industrial Revolution, enterprises must achieve digital, AI, and IoT innovation and interact in innovative environments. In particular, the development of organizational and management systems secures corporate competitiveness in a fiercely competitive environment and increases corporate innovative performance. Based on this context, systems in enterprises have rapidly become a catalyst for overall organizational growth and sustainability. This Special Issue will contribute to expanding the systems research field by comprehensively exploring the various roles and verifying the influence of systems on many aspects of enterprises. Researchers can contribute to the development of strategies for organizational innovation, development, and sustainability. This Special Issue focus on system analysis, digital transformation, internal control, green innovation, organizational systems, and ESG. We particularly look forward to helping researchers to contribute their theoretical and practical knowledge. Specifically, this Special Issue will encourage authors to submit empirical research, system analyses, meta-analyses, and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.
