

Special Issue

Transforming Risk and Reliability Engineering through Artificial Intelligence and Model-Based Paradigms

Message from the Guest Editor

This Special Issue provides a platform for researchers, practitioners, and professionals to share their latest research findings, case studies, and developments in the areas of risk and reliability in systems engineering, including the emerging technologies of MBSE, MBPD, and AI. In addition to traditional topics such as risk analysis, reliability engineering, and systems safety, this Special Issue welcomes topics such as condition-based maintenance (CBM), system resilience, availability modeling, risk-based decision making, uncertainty modeling, probabilistic risk assessment (PRA), and more. By addressing these emerging topics, the Special Issue will help to update readers on the latest developments in the field and gain a deeper understanding of the challenges and opportunities that lie ahead. For detailed information, please visit: mdpi.com/journal/systems/special_issues/33O790EN20

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
