

Special Issue

Data Analytics for Social, Economic and Environmental Issues

Message from the Guest Editors

Data are being generated at a much faster rate, and the volume of data being collected in business, engineering, science, and other fields is much greater than ever before. This has huge implications for data-related issues. Data analytics (DA) is becoming increasingly important in all aspects of business management and a major area of study for both practitioners and researchers. The application of DA techniques and tools to analyze large and complex data for various applications can help organizations harness vast amounts of data to gain actionable insights and uncover useful information for making informed decisions across business processes while adjusting to consumer preferences. Through DA, organizations and policy makers can gain valuable insights by analyzing trends, patterns, and citizen/consumer behaviors with implications for social, economic, and environmental performance. This Special Issue will contribute to a better and more comprehensive understanding of DA in the social, economic, and environmental dimensions of the business landscape.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
