

Special Issue

Organizational Digital Innovation and Transformation in Enterprise and Government Strategies

Message from the Guest Editors

This Special Issue focuses on the role of systems in fostering organizational innovation and driving digital transformation. Systems are pivotal in enabling organizational change and introducing new capabilities. We invite scholars from related fields to explore the key roles and impacts of systems. Manuscripts offering innovative perspectives, cutting-edge insights, cross-disciplinary integration, and diverse research methods are especially encouraged. Information security is also a critical concern in the systems of organizational transformation. Natural language processing is a key tool and application in this process. Systems are the core of organizational digital innovation and transformation. They offer the necessary infrastructure, manage and analyze data, automate processes, enhance customer experiences, and support both strategic and operational goals. This Special Issue aims to explore the study of organizational digital innovation and transformation systems, along with a detailed examination of various research areas in corporate and government strategies.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.
