

## Special Issue

# Intelligent Sensing and Computing Methods for Cyber-Physical Systems

### Message from the Guest Editors

The cyber-physical system (CPS) has been coming into view and will be increasingly applied in our daily lives and in business process management. The emerging CPSs must be robust and responsive for their implementation in coordinated, distributed, and connected ways. Topics of interest include but are not restricted to:

- New methods for intelligent computing in combination with deep learning;
- Faster and more robust intelligent computing methods for learning of deep models;
- Evolutionary and intelligent computing-based optimization and tuning of deep learning models;
- Evolving and intelligent computing techniques for deep learning systems;
- Hybrid learning schemes with intelligent computing;
- Intelligent computing methods for non-established deep learning models;

## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei  
Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -  
Q2 (Modeling and Simulation)
