Human-Centric and Inclusive Emerging Approaches for Sustainable and Resilient Industry 5.0 Systems

Message from the Guest Editors

This Special Issue aims to explore how emerging human-centric and inclusive approaches, sustainability, resilience, and circularity co-evolve in Industry 5.0 systems. By showcasing recent experimental evidence, it will contribute to overall sustainability across social, economic, and environmental dimensions. The topic aligns with *Systems* by addressing the modeling and analysis of complex socio-technical systems, integrating engineering, behavioral, and organizational perspectives.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.
