Digital Transformation in the Era of Technological Disruption: The Reshaping and Application of Emerging Technologies on Management Models

Message from the Guest Editors

This Special Issue explores the profound impact of emerging technologies such as Artificial Intelligence (AI), Big Data, Blockchain, and the Internet of Things (IoT) on modern management practices. In today's rapidly evolving business landscape, these technologies not only enable operational efficiencies, but also drive strategic innovations, transforming business models, and reshaping the way organizations make decisions. By focusing on how these technologies are integrated into various business functions—ranging from strategic planning and customer relationship management to supply chain optimization and financial operations—this Special Issue highlights both the opportunities and challenges presented by the digital transformation process. It aims to provide comprehensive insights into how companies leverage these technologies to enhance their competitiveness, sustainability, and agility in an increasingly complex environment. About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
