

Special Issue

Sustainable Business Models and Digital Transformation

Message from the Guest Editor

This Special Issue seeks to explore how systemic approaches to sustainable business models and digital transformation contribute to the evolution of entrepreneurial ecosystems, corporate strategies, and policy development. We invite contributions that examine the interplay between digitalization and sustainability from a systems-oriented perspective, offering insights into frameworks, methodologies, and real-world applications that shape the future of sustainable entrepreneurship. Topics of interest include, but are not limited to, the following:

- Sustainable business model innovation;
- Digitalization and circular economic strategies;
- Technology-driven sustainability solutions;
- Digital platforms and sustainability transitions;
- The role of artificial intelligence in sustainable business;
- Systemic approaches to sustainable digital transformation;
- Measuring the impact of digital sustainability initiatives;
- Policy and governance frameworks for digital sustainability;
- Corporate strategies for achieving SDGs through digital means.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief
