Special Issue

Dynamics of Modern Financial Systems: Inclusion, Complexity, and Institutional Resilience

Message from the Guest Editors

This Special Issue seeks to reignite the debate on the stability of the financial system, highlighting how its dynamics and complexity increase systemic risk. By intermediating resources between economic agents, the financial system creates a network of interdependencies between them. As this network expands, complexity increases, and it becomes more difficult to predict the factors that affect stability. Thus, our aim is to collate articles that address the dynamics and complexities of the financial system and suggest policies capable of predicting and mitigating systemic risk and fostering financial resilience and stability.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business School, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q1 (Modeling and Simulation)
