

Special Issue

Ethics and Governance of Artificial Intelligence (AI) Systems

Message from the Guest Editor

This Special Issue explores comprehensive ethical and governance challenges in AI implementation, examining how organizations develop frameworks to ensure AI systems operate responsibly, transparently, and effectively. We seek contributions addressing algorithmic accountability, data security, system reliability, and the balance between automation and human oversight. Research areas include ethical frameworks for AI deployment, governance models and regulatory approaches, transparency in machine learning systems, cybersecurity considerations, risk assessment frameworks, and best practices for the responsible implementation of AI.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
