

Special Issue

Advancing Project Management Through Digital Transformation

Message from the Guest Editors

This Special Issue explores the intersection of project management and digital transformation, aiming to uncover innovative methods, tools, and strategies that enhance project performance across industries, e.g., manufacturing, production, construction, transportation, professional service, healthcare, and IT, among others. Key themes include the adoption of digital enablers including but not limited to building information modelling (BIM), artificial intelligence (AI), machine learning (ML), digital twins, blockchain, and Internet of Things (IoT) technologies in project management. The Special Issue also addresses challenges such as data integration; interoperability; agile, organizational change management; project designs; and cybersecurity, this Special Issue seeks to provide cutting-edge insights and foster cross-disciplinary research. We invite submissions from academics and practitioners alike, offering conceptual frameworks, rigorous reviews, empirical studies, or practical applications that demonstrate the transformative potential of digital innovation in project management.

Guest Editors

Dr. Lihong Zhang

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
