

Special Issue

Service Ecosystems: Resilience and Sustainability

Message from the Guest Editors

This Special Issue intends to concentrate the evaluation of these two concepts around the service ecosystems perspective, to strongly support the ability to adapt. Through their integration of dynamic capabilities and resources, ecosystems can provide a basis for the dynamic rearrangement of existing resources and innovatively advance the formulation of new value propositions for our society. This Special Issue seeks original contributions on both theoretical and practical aspects related to the following themes, among others:

- Convergent value co creation processes to support resilience and sustainability in service ecosystems.
- The formulation of new value propositions in service ecosystems.
- The (sustainable) value of data in supporting innovative smart service design.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
