

## Special Issue

# Intelligent Systems and Cybersecurity

### Message from the Guest Editors

This Special Issue welcomes contributions on the challenges to provide an intelligent, secure, and reliable systems, including the following list of topics:

- Cybersecurity challenges in cyberphysical systems;
- Artificial intelligence algorithms for improving CPS cybersecurity;
- Industrial CPS applications for cybersecurity;
- Challenges of AI and security in cyberphysical production systems;
- Availability of critical cyberphysical systems;
- AI for new applications in health systems;
- Intelligent Systems for medical diagnostics;
- Privacy and security on AI algorithms;
- Intelligent systems for data privacy.

## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.
