

Special Issue

Systems Thinking and Models in Public Health

Message from the Guest Editors

We are pleased to announce a Special Issue on “Systems Thinking and Models in Public Health”. Systems Thinking and Modeling have been essential approaches to identifying drivers of health outcomes and analyzing their complex interrelationships, hence paving the way to find interventions that improve outcomes while minimizing unintended consequences. These methods support interdisciplinary teams in representing and navigating complex systems, thus asking essential ‘what-if’ questions and serving numerous other goals, from guiding data collection efforts to comparing the perspectives of stakeholders or validating theories. This Special Issue seeks methodological *innovations and applications* for several *determinants* and key population global *health* priority areas. We solicit papers for this Special Issue that broadly deal with such challenges by addressing open questions, providing novel case studies, or leading to interesting and challenging debates. Papers can be reviews, syntheses, viewpoints, meta-analyses, or original research articles.

Guest Editors

Dr. Philippe J. Giabbanelli

Department of Computer Science & Software Engineering, Miami University, Oxford, OH 45056, USA

Prof. Dr. Andrew Page

Translational Health Research Institute, Campbelltown Campus, Western Sydney University, Locked Bag 1797, Penrith, NSW 2751, Australia

Deadline for manuscript submissions

closed (15 August 2023)

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
