

Special Issue

Modeling and Simulation for Decision Support in Urban and Transportation Systems

Message from the Guest Editors

This Special Issue aims to advance modeling, simulation, and decision support for urban and transportation systems. It seeks contributions that develop new methodologies, integrate diverse data sources, improve system understanding across scales, and demonstrate real-world applications, with attention to the dynamic interactions among infrastructure, mobility, technology, environment, and society.

Guest Editors

Dr. Francesco Rouhana

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q1 (Modeling and Simulation)
