Special Issue

Systems Science Addressing Health Disparities: Thinking, Modelling & Practice

Message from the Guest Editors

This Special Issue seeks to address these gaps by encouraging the submission of papers applying systems science methods (e.g., causal loop diagramming, systems mapping, scenario analysis, systems dynamics and agent-based modelling, micro-simulation, network analysis) that focus on:

- Understanding of the systems that give rise to and perpetuate disparities in health-related behavior and/ or outcomes:
- b. Efforts seeking to identify, implement or evaluate policies or interventions to eliminate disparities in health-related behavior and/or outcomes.

Contributors are invited to present papers (including methods papers) exploring or directly relevant to a range of disparities. Some examples of relevant topics include:

- Health-related behaviors;
- Infectious disease:
- Health services:
- Health policy;

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The Systems journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg

Operations & Service Management Department, Aston Business School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
