

Special Issue

Modeling, Planning and Management of Sustainable Transport Systems

Message from the Guest Editor

This Special Issue aims to present and disseminate the most recent advances in the formation of sustainable transport systems. Both original research and review works are welcome. Topics of interest for publication include, but are not limited to, the following:

- Solutions for organizing sustainable transport in different areas and regions;
- Transportation policy and the implementation of sustainable development;
- Technical potential of transport service providers, including their ability to implement changes;
- Modern technologies used in sustainable transportation systems;
- Economic and environmental aspects of alternative-powered vehicles;
- Information systems supporting the eco-development of transportation;
- Decision support methods in eco-transport management issues;
- Fleet conversion processes;
- Ecological considerations.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
