

Special Issue

Systems Thinking and Design for Transformative Innovation

Message from the Guest Editors

This Special Issue aims to explore the synergies between systems thinking and design in fostering sustainable innovation and transformation across various domains. Systems thinking offers a holistic approach to problem-solving, emphasizing interconnectedness, feedback loops, and dynamic complexity. Design, on the other hand, provides tools and methodologies for creative problem-solving and user-centric solution development. When combined, these two disciplines offer a powerful framework for addressing complex challenges facing society today, particularly in the context of sustainability. Topics of interest include but are not limited to:

- Theoretical foundations of systems thinking and design thinking;
- Methodologies for integrating systems thinking and design in innovation processes;
- Case studies illustrating successful applications of systems thinking and design for sustainability;
- Tools and techniques for facilitating collaboration between stakeholders in sustainable innovation projects;
- Ethical considerations and implications of using systems thinking and design for sustainability initiatives.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
