

Special Issue

Extended Reality Application and Management Systems

Message from the Guest Editors

Extended reality (XR) is a term used to refer to mixed reality (MR) technology that encompasses both virtual reality (VR) and augmented reality (AR). The applications of XR are emerging in everyday life through the use of immersive technologies that can merge the physical and virtual worlds. Although XR has been flourishing in fields such as education, gaming and entertainment, it is becoming critical in other fields and practices for its ability to visualize a completed project in advance and demonstrate how to control and manage it based on sound simulation or avatars that can interface with actual systems. This Special Issue focuses on studies related to XR applications and management systems. We are interested in submissions that utilize a variety of methodological perspectives and welcome both original research and review articles. For further information, please visit:

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
