

Special Issue

Research Trends on the Development of Integrated and Robust Social Development Management Systems

Message from the Guest Editors

The social environment in which humans live is inevitably affected by the development of technology. The ongoing institutionalization of large-scale investments in social policies to promote sustainable development and economic growth presents many challenges with the creation of necessary capacity and robust systems for effective management of such schemes in all phases of their implementation cycle. This Special Issue focuses on research on social management systems that are changing with the development of technology. We are interested in submissions utilizing a variety of methodological perspectives, and welcome both original research and review articles. Potential topics include (but are not limited to) the following: Education technology and management systems; Healthcare technology and management systems; Business technology and management systems; Culture technology and management systems; IT and computer-based social management systems; etc. For further information about the topics of interest, please visit: mdpi.com/journal/systems/special_issues/sdms

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.
