

Special Issue

Systems Thinking in Practice (STiP)

Message from the Guest Editors

Systems thinking in practice (STiP) is itself an understated arena of research and scholarship that goes beyond academic framing of systems thinking in traditional terms of three waves—hard, soft, and critical. STiP invites different types of questions in which the relational dynamics of practice are in the foreground and the distinct tools, methods, and framework of ideas provide the backdrop.

This Special Issue of *Systems* invites you to reflect and report on emotional, ethical, and political challenges that confront the systems thinking practitioner engaging with messy situations and enacting STiP (Ison, 2017; Reynolds and Howell, 2020). We look forward to contributions that address such questions and prompt investment strategies for improved STiP. Further information can be found from:

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. Ben Clegg
Operations & Service Management Department, Aston Business
School, Aston University, Birmingham B4 7ET, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei
Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore -
Q2 (Modeling and Simulation)
