

Special Issue

Recent Progress in Bioimaging and Targeted Therapy

Message from the Guest Editors

Bioimaging is used to visualize biomolecules and their biological activity in a specific period of time. It does not influence the life processes during visualization, but can help understanding biological activities in molecular levels and connecting the observation of subcellular structures with multicellular tissues and organs.

Targeted bioimaging contributes to current therapy by providing evidence for disease diagnosis; locating and guiding surgical operation; indicating the time and position to perform treatments; and evaluating therapeutic effects. The topics of this Special Issue may include the following themes:

- bioimaging
- targeted bioimaging
- activatable imaging probes
- chemotherapy
- photodynamic therapy
- photothermal therapy
- gene therapy
- immunotherapy

About the Journal

Message from the Editor-in-Chief

Targets is an Open access journal devoted to the fast publication of the latest achievements in bio-detection and therapy. It provides important supports for the development of the related interdisciplinary areas of chemistry, life science, biomedicine, material science, and environment science, particularly in new drug development, disease diagnosis, early warning and targeted therapy, life process study, food and environment safety monitoring, quality control of products, forensic medicine, and even anti-terrorism.

Editor-in-Chief

Prof. Dr. Huangxian Ju
State Key Laboratory of Analytical Chemistry for Life Science, School of Chemistry and Chemical Engineering, Nanjing University, Nanjing 210023, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.8 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
