

Special Issue

The Applications and Challenges of Cybersecurity in Science, Healthcare and Medicine II

Message from the Guest Editor

Healthcare is an attractive target for cybercrime as it contains extremely valuable data. Several issues currently complicate healthcare cybersecurity. Cybersecurity breaches include stealing health information, ransomware attacks on hospitals, and may include attacks on implanted medical devices. Such breaches can reduce patient trust, cripple health systems, and threaten human life. Aligning cybersecurity and patient safety initiatives will not only help your organization to protect patient safety and privacy but will also ensure continuity of effective delivery of high-quality care by mitigating disruptions that have a negative impact on clinical outcomes. Rising cybersecurity threats to healthcare require policy makers to tackle fragmented governance, develop and implement security standards, and help organizations to improve their resilience. The goal behind this Special Issue is to discuss and present various tools, applications, and models in the context of cybersecurity, in addition to extensive and comprehensive concepts and techniques with regard to science, healthcare, and medicine. All related areas may also be considered.

About the Journal

Message from the Editor-in-Chief

Technologies, provides a single focus for reporting on developments of all technologies, regardless of their application. It is our intention that *Technologies* becomes the journal of choice for both researchers wanting to publish their work and technologists wishing to exploit the high quality research across a wide range of potential applications. Through its open access policy, its quick publication cycle, *Technologies* will facilitate the rapid uptake and development of the research presented, ultimately providing benefit to the wider society.

Editor-in-Chief

Prof. Dr. Manoj Gupta

Department of Mechanical Engineering, National University of
Singapore, Singapore 117576, Singapore

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Inspec, Ei
Compendex, INSPIRE, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1
(Computer Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21.1 days after
submission; acceptance to publication is undertaken in 3.6
days (median values for papers published in this journal in
the second half of 2024).
