

Special Issue

Digitalization, Information Technology and Social Development

Message from the Guest Editor

Currently, we live in a digital society filled with cutting-edge ICT solutions. Mobile devices, apps, e-services, etc., are available at any time and everywhere. However, there are still parts of our planet that suffer from digital division. Access to the latest modern-day solutions may be limited because of numerous factors, including access to education, labor markets, etc. With the aid of academics and professionals, the quality of life of such individuals can be improved. In this Special Issue, we invite the scientific community to publish works focused on digitalization, information technology, and social development. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Bridging the digital divide;
- Broadcasting and communication systems;
- E-business, e-commerce, and e-governance;
- E-health and telemedicine;
- Media digitization;
- Quality of life;
- Smart cities, schools, and education.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I would like to introduce the new, online, and open access journal *Telecom*. The purpose of *Telecom* is to publish high-quality research papers as well as review articles that address recent advances in communications technology. We invite researchers to contribute original papers describing applications and experiences in emerging trends of all fields of telecommunications engineering. *Telecom* also welcomes Special Issue proposals from academics and industrial researchers. We aim to facilitate more collaboration between scientists and engineers around the world, such that they will produce their innovative ideas and submit their cutting-edge technologies to *Telecom*. We anticipate the receipt of your contributions to *Telecom*, and we welcome your comments and ideas on how to improve this journal.

Editor-in-Chief

Prof. Dr. Sotirios K. Goudos
Department of Physics, Aristotle University of Thessaloniki, 54124
Thessaloniki, Greece

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, Ei Compendex, and other databases.

Journal Rank:

CiteScore - Q2 (Electrical and Electronic Engineering)
