

## Special Issue

# Fibrous Materials (Textiles) for Functional Applications

### Message from the Guest Editors

We are pleased to announce a Special Issue titled “Fibrous Materials (Textiles) for Functional Applications” in *Textiles*, an open access MDPI journal. Fibrous/textile materials constitute an inseparable component of our day-to-day life. Their importance ranges from baby diapers to life-saving protective textiles in military and space applications. The geometrical flexibility and physical–chemical diversity of functional fibrous materials makes them a preferred substitute over metals, ceramics, and other forms of polymers. Fiber-based functional textiles are widely used in technical applications. e.g., acoustic textiles, electronic textiles, fiber-reinforced structural composites, geotechnical textiles, healthcare and medical textiles, nanoenabled textiles, protective textiles, smart clothing, sports textiles, thermos-regulating textiles, and so on.

The Special Issue is aimed at young researchers working on fiber-based functional materials in any concurrent application area. The exposure of young scientists to open access articles in the selected area will provide new insights for future research and innovation.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Jintu Fan

School of Fashion and Textiles, The Hong Kong Polytechnic University,  
Hong Kong 999077, China

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO and other databases.

##### Journal Rank:

JCR - Q1 (Materials Science, Textiles)
