New Research Trends for Textiles

Message from the Guest Editor

The *Textiles* journal is a peer-reviewed, open-access journal, launched on 2020. It concerns research and innovation in the field of textile materials. This field is very broad and covers many topics. Textile materials composed of fibers linked by weaving, braiding, knitting, or sewing constitute a wide range of materials and are essential for many applications. They both are ancestral materials used since antiquity and are used for advanced applications, such as composites in aeronautics or the medical industry (Boisse, 2021). In order to demonstrate the huge impact of textile research and technology in the world, the Publisher and Editorial Board have decided to invite contributions, feature papers, from key and world-class researchers which will be collected in a single Special Issue entitled "New World Research Trends for Textiles".
