CIRP Network Collection: Advances in Co-clinical Quantitative Imaging Research

Message from the Guest Editors

The National Cancer Institute's Co-Clinical Imaging Research Resource Program (CIRP) promotes the development of quantitative imaging resources for therapeutic or prevention co-clinical trials that study both patients and human-in-mouse models. The program facilitates consensus on quantitative imaging methods and standard operating procedures for co-clinical applications. CIRP is committed to the development of freely accessible, comprehensive information resources to guide co-clinical imaging investigations in the context of experimental design, protocol and software development, modeling and information extraction, biological and pathological validations, multiscale data integration, and preclinical-clinical correlations.

Guest Editors

Dr. Dariya Malyarenko

Prof. Dr. Michael Lewis

Dr. Huiming Zhang

Prof. Dr. Cristian T. Badea

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Emilio Quaia
Department of Radiology, University of Padova, 35100 Padova, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q2 (Radiology, Nuclear Medicine and Medical Imaging) / CiteScore - Q2 (Radiology, Nuclear Medicine and Imaging)
