Imaging in Non-Traumatic Emergencies

Message from the Guest Editors

Non-traumatic emergencies include a wide spectrum of clinical entities that often require a prompt imaging assessment to prevent potentially serious or irreversible conditions. Non-traumatic emergencies represent a large number of requests for referrals to any emergency department that does not necessarily share the same approaches, protocols, or guidelines. However, the demand of diagnostic imaging in the ER department has risen dramatically and the role of 24/7 radiologists, as members of ER teams, has become more effective. In this issue, the complexity of some relevant pathological entities will be illustrated, emphasizing the role of the state-of-the-art imaging, the clues to diagnosis and the impact on the management decision process.

Guest Editors

Dr. Stefania Tamburrini

Department of Radiology, Ospedale del Mare-ASLNa1 Centro, 80147 Napoli, Italy

Prof. Dr. Mariano Scaglione

1. Department of Radiology, James Cook University Hospital, Marton Road, TS4 3BW Middlesbrough, UK

2. Department of Medical, Surgical and Experimental Sciences, University of Sassari, 07100 Sassari, Italy

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Emilio Quaia
Department of Radiology, University of Padova, 35100 Padova, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q2 (Radiology, Nuclear Medicine and Medical Imaging)
