## Endocrine-Disrupting Chemicals and Reproductive Toxicology

Guest Editor:

**Dr. Michał Hubert Wróbel**

Department of Physiology and Toxicology, Institute of Animal Reproduction and Food Research, Polish Academy of Sciences, Olsztyn, Poland

Deadline for manuscript submissions:

**closed (30 September 2025)**

### Message from the Guest Editor

This Special Issue aims to contribute to novel research on the cellular and molecular mechanisms of endocrine-distributing chemicals and how they impact reproduction. We encourage the study of currently used chemicals and their metabolites, as well as protection products that are commonly recognized as persistent environmental contaminants and have been banned previously. This can improve their risk assessment, but also potentially aid in finding substances with beneficial effects on reproduction.

Papers may include, but are not limited to, the following topics: the molecular or epigenetic mechanisms behind the toxicity of chemicals; disorders related to the receptivity and further signal transmission of reproductive hormones; in vitro studies; and/or predictive or computational reproductive toxicology approaches.

Authors are invited and welcome to submit original research papers, reviews, short communications, and case reports.

## Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)
