Riverside, CA, USA

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editor

Biomass burning is the dominant source of carbonaceous aerosol, affecting regional air quality and global climate, and thus directly and indirectly impacting human health. Large amounts of aerosol particles and gaseous pollutants are emitted into the atmosphere, which can be transported thousands of kilometers away from the source areas, while undergoing chemical and physical transformations. Consequently, physico-chemical and toxicological characteristics of biomass burning aerosols are complex and highly variable.

This Special Issue, therefore, aims to disseminate the latest research findings from either field or modeling studies, investigating the inherent properties of smoke emissions from different types of biomasses burning. Authors are invited to submit manuscripts reporting results from ambient air measurements, controlled combustion experiments, as well as targeted health effects studies. Ultimately, we hope to convey with this Special Issue a better understanding of the chemical, physical and toxicological properties of aerosol emissions from biomass burning processes to scientists across various disciplines.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
