### Message from the Guest Editors

Dear Colleagues,

We solicit manuscripts addressing emission sources, atmospheric transformation, and dispersion of aerosol particles in this Special Issue on this topic. Exposure assessment, aerosol chemistry and toxicology, and environmental studies are topics of interest in this Special Issue. Both research articles and reviews on the methodological aspects and on specific applications are welcome. Atmospheric studies of primary and secondary organic aerosols, particle-bound toxins such as transition metals, and their related oxidative potential are of specific interest due to their importance for understanding the health impacts of particles.

We look forward to receiving your contributions.
