### Message from the Guest Editors

Poisoning has always been a part of human life. The causes and scientific understanding of poisoning has changed over time, and with them the opportunities for its correct diagnosis and treatment. Drug poisoning causes harmful effects on the health of certain therapeutic drugs, resulting either from overdose or from the sensitivity of specific body tissues to regular doses (side effects). Chronic poisoning is by far the most common “intoxication” affecting our society in this broad sense of the term, but also acute intoxication represents an ongoing challenge. This Special Issue welcomes any original research articles, reviews and short communications (without limits to word length) that focus on the mechanisms of poisoning (accidental or not accidental); acute or chronic exposure; identifications of medicine or illicit drugs; diagnosis and therapeutic options; medical and social solutions. Studies that use metagenomics and metabolomics are encouraged, as well as those establishing predictive tools for monitoring health impacts.

## Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
