Association of Environmental Exposures with Mental and Cognitive Health

Guest Editors:

Dr. Hicran Altug

Dr. Tamara Schikowski

Dr. Rachel Tham

Deadline for manuscript
submissions:

closed (5 April 2023)

Message from the Guest Editors

Cognitive, behavioural, and emotional well-being is important at every stage of life, from childhood and adolescence through adulthood to older age. Environmental exposures are hypothesized to contribute to mental and cognitive health, but to date, the overall results are heterogeneous.

We encourage and warmly welcome researchers to submit original research articles or reviews on (but not limited to) the following topics: results of epidemiological studies on risk factors associated with environmental exposures (air pollution, traffic noise, greenness, temperature, etc.), which affect cognitive function and/or mental health (for example: depression, anxiety, dementia, etc). Studies on the combined effects of multiple environmental exposures are highly welcome. We are especially interested in studies investigating sensitive or higher risk groups exposed to various environmental pollutants (for example: pregnant women, children, the elderly, people who are immune compromised, and those living with chronic pulmonary or cardiovascular diseases, etc.).

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)
