

## Special Issue

# Association Between Environmental Pollutants Exposures and Chronic Disease

### Message from the Guest Editor

This Special Issue will examine the potential mechanisms through which environmental exposure affects chronic diseases and its induced mental health, present epidemiological evidence, and investigate the relationship between early exposure and disease development. It will also explore the effects of various pollutants on multiple biomarkers of chronic diseases and discuss intervention strategies. Additionally, this Special Issue will highlight innovative advances in pollution exposure assessment methods, particularly their application in high-risk populations and their implications for public health. By reviewing existing literature and compiling cutting-edge research, this Special Issue aims to provide the latest scientific data and analysis for academia, public health, and policymakers; promote research advancements in related fields; and offer theoretical support for the development of effective environmental pollution control and health protection policies.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
