

## Special Issue

# Ecological Reconstruction and Safety Risk Assessment of Contaminated Sites

### Message from the Guest Editor

The goal of this Special Issue is to publish papers that risk characterization of contaminated sites, and after ecological reconstruction, the potentially toxic elements (such as cadmium and arsenic) bioavailability, and which affect on the ecological system, for example, the biodiversity, etc. Potential toxic elements on the soil-microbial-crop system, which indicates the change ecological in soil, or microbial, or crops, which are welcome!

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2025).
