

Special Issue

Environmental Fate and Exposure Assessment of Emerging Contaminants

Message from the Guest Editors

We are delighted to invite you to submit your research for this upcoming Special Issue, titled "Environmental Fate and Exposure Assessment of Emerging Contaminants" in *Toxics*. **Focus and Scope** This Special Issue will examine the dynamics of Emerging Contaminants (ECs) in water, soil, air, and biota, covering degradation kinetics, multimedia partitioning, predictive modeling, and climate-influenced scenarios. It prioritizes exposure assessments for humans and ecosystems via dietary, inhalation, and dermal routes, alongside health impact studies integrating toxicology, epidemiology, and risk analysis. Original research, reviews, and modeling advancing mitigation strategies for public health protection are encouraged. **Positioning in the literature** Building on established reviews of EC persistence and low-dose effects in wastewater and food chains, this Issue will address gaps in climate-exacerbated transformation products and vulnerable population exposures. It complements *Toxics*' scope on toxicants by providing integrated fate-exposure-health frameworks, extending prior work in environmental chemistry toward actionable public health insights.

Guest Editors

Dr. Maciej Tankiewicz

Dr. Monika Cieszyńska-Semenowicz

Dr. Andrzej R. Reindl

Dr. Agnieszka Fiszka Borzyszkowska

Deadline for manuscript submissions

31 October 2026

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
