

Special Issue

Ozone Pollution and Adverse Health Impacts

Message from the Guest Editors

The goal of this Special Issue is to demonstrate new studies in the fields of ozone pollution and adverse human health, including but not limited to the following: (1) sources and control of indoor and outdoor ozone; (2) epidemiological and toxicological evidence showing the effects on human health (such as cancer and pulmonary, cardiovascular, central nervous, endocrine, and reproduction diseases) from exposure to outdoor or indoor ozone reaction products or ozone combined with other pollutants/meteorological factors; (3) the mechanisms of pathophysiological changes induced by long-term or short-term ozone; (4) the important and specific biomarkers of ozone exposure, prevention, and intervention of ozone-induced deleterious effects; (5) risk and health impact assessments, and risk management; and (6) prevention and treatment using nutrients or Chinese medicine for ozone-related health effects. This Special Issue encourages the contributions of new research papers, reviews, and case reports addressing the aforementioned topics.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,
08034 Barcelona, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
