

Special Issue

Sources and Removal of Organic Pollutants in Wastewater

Message from the Guest Editors

The preservation of water resources and the aquatic environment is a key issue for humanity. During the last several decades, many researchers have focused on the characterization of organic pollutants in wastewater and their removal to seek better management and effective protection of the aquatic environment.

This Special Issue “[Sources and Removal of Organic Pollutants in Wastewater](#)” will focus on (i) the recent advances in analytical methods developed for the identification and quantification of organic micropollutants in wastewater, including target, semi-target, and non-target screening techniques; as well as (ii) innovative treatment techniques to reduce or remove organic micropollutants from wastewater. These innovative techniques may be biological treatments, catalyzed (photo)oxidation, adsorption or other techniques appropriate for wastewater treatment. Original research articles, reviews, and short communications are welcome.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
