

Special Issue

Clinical and Post-Mortem Toxicology

Message from the Guest Editor

It is my pleasure to invite you to submit papers in the field of clinical, post-mortem, and forensic toxicology. Papers (also review papers) addressing the methodology of comprehensive toxicology screening, as well as the presentation of clinical cases and case series, and post-mortem and forensic toxicology, are all welcome. This Special Issue will deal with the challenges in detecting exposure and intoxications of various (recreative) drugs and novel active psychoactive drugs that are widely available on the internet. How do we detect these agents and their metabolites in body fluids? What are the potentials and limitations of comprehensive and targeted toxicology screening in both clinical and forensic settings? What are the options and challenges for drugs testing at the point of care and crime? This Special Issue also addresses novel options for the clinical management of intoxicated patients, including the prevention of (re)absorption, and the extracorporally enhanced elimination of drugs and specific antidotes. In cases of post-mortem toxicology, how do we interpret drug levels in blood and how do we deal with post-mortem redistribution and degradation?

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
