

Special Issue

Endocrine-Disrupting Chemicals and Reproductive Toxicology

Message from the Guest Editor

This Special Issue aims to contribute to novel research on the cellular and molecular mechanisms of endocrine-disrupting chemicals and how they impact reproduction. We encourage the study of currently used chemicals and their metabolites, as well as protection products that are commonly recognized as persistent environmental contaminants and have been banned previously. This can improve their risk assessment, but also potentially aid in finding substances with beneficial effects on reproduction. Papers may include, but are not limited to, the following topics: the molecular or epigenetic mechanisms behind the toxicity of chemicals; disorders related to the receptivity and further signal transmission of reproductive hormones; in vitro studies; and/or predictive or computational reproductive toxicology approaches. Authors are invited and welcome to submit original research papers, reviews, short communications, and case reports.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
