

## Special Issue

# Firefighters' Occupational Exposures and Health Risks

### Message from the Guest Editors

Firefighting activities include a combination of exposures, involving a highly complex mix of hazards such as smoke and combustion products, soot, physical exhaustion, hyperthermia and dehydration, exposure to chemicals, night work, noise and mental stress.

Firefighting exposures have been associated with cancer in humans, with sufficient evidence for causality (IARC 2022). Authors are warmly invited to submit original research papers and state-of-the-art reviews addressing the field of firefighters' occupational exposures and health risks. The topics of interest include, but are not limited to, the following: assessment of firefighters' exposure to health-relevant hazards; use of biomarkers to assess occupational exposure and associated effects; mechanisms of toxicity. All submitted manuscripts will go through a rigorous peer review process.

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
