

Special Issue

Reproductive and Developmental Toxicity of Environmental Factors

Message from the Guest Editors

In the Special Issue “Developmental Toxicity of Environmental Chemicals”, we aim to explore the incidence, effects, and mechanisms of environmental chemicals on prenatal and postnatal development. We invite high-quality original research papers, short communications, and reviews on the developmental toxicity of environmental agents. Topics of interest include, but are not limited to, the following: Developmental toxicity mechanisms of traditional or emerging contaminants; The effects of environmental developmental toxicity on ecosystems; The relationship between congenital diseases and maternal exposure to environmental chemicals; Protective and intervention strategies against the developmental toxicity of environmental pollutants.

Guest Editors

Dr. Tao Chen

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
